OBJECTIVE

Highly motivated and detail-oriented computer systems engineer and front-end web developer with a strong passion for creating innovative and user-friendly web applications. Seeking an opportunity to leverage my technical skills and project experience to contribute to a dynamic organization.

EDUCATION

Bachelor's Degree in Computer Systems Engineering

Universidad Tecnológica de México | México City, México | September 2018 – April 2022

- Graduated with a GPA of 3.9/4.0, ranking first in my class/generation.
- Relevant Coursework: Software Engineering, Object-oriented programming, Database Systems, Information Architecture, Web Analytics.

High School Bicultural Diploma

Universidad del Valle de México | State of México, México | August 2015 – August 2018

TECHNICAL SKILLS

- Programming languages: Python, Javascript, C++, C#, C, Java, Assembler, Kotlin, Apex.
- Web Development Tools: HTML, CSS, Javascript, Bootstrap, React, Visual Studio Code, Visual Basic, Canva, Amazon Web Services.
- Version Control: Git, GitHub, Streamlit.
- Database Management: MySQL, Access, MongoDB.
- Operating Systems: Microsoft, Linux, and Mac.
- Networking: Network Protocols, LAN/WAN.
- Digital Marketing: Google AdWords, Facebook, Instagram, and Twitter.
- Google Workspace: Gmail, Drive, Meet, Sites, Presentations, Documents, Forms, Classroom, AdWords, and Ads.
- Microsoft Office: Word, Excel, OneNote, PowerPoint, Teams, OneDrive, Outlook.
- Automation: Automation Anywhere, Automation 360 Platform.
- Video Editing and creation: Wondershare Filmora.
- Additional tools: Salesforce, and MATLAB.

PROJECTS

1. Portfolio Website. <https://mariana-tellez-resendiz-portfolio.netlify.app/>
 - ✓ Created a personal portfolio website using HTML5, CSS3, Javascript and Bootstrap.
 - ✓ Showcased all my projects, skills, and contact information in an organized and visually appealing way.
 - ✓ Ensured cross-browser compatibility and responsiveness for optimal user experience.
2. Weather App. <https://weather-app-mariana-tellez-resendiz.netlify.app/>
 - ✓ Developed a responsive weather application using HTML5, CSS3, Bootstrap and JavaScript.
 - ✓ Utilized an API to fetch and visually display the weather data.
 - ✓ Implemented features such as location search, temperature conversion, and dynamic backgrounds based on the hour.
3. World Clock App. <https://world-clock-app-mariana-tellez.netlify.app>
 - ✓ Built a responsive webpage using moment.js that offers users a convenient solution to view the time across different time zones around the world.
 - ✓ Implemented a user-friendly search functionality that allows users to quickly find the time zone of their current location.
4. Hobby Page. <https://hobby-page-mariana-tellez-resendiz.netlify.app/>
 - ✓ Developed a dynamic hobby page showcasing my favorite hobby.
 - ✓ Implemented flexibility for users to switch between dark and light themes on the webpage, enhancing user experience and customization options.
 - ✓ Leveraged the grid system to create a well-structured layout that adapts flawlessly to different screen sizes, ensuring optimal viewing experience across devices.
5. Favorite Music: <https://mariana-favorite-music.netlify.app/>
 - ✓ Designed and developed an engaging website showcasing a curated collection of my preferred tracks, artists, albums, and songs.
 - ✓ Leveraged the power of Spotify embeds to integrate audio playback directly into the website, providing visitors with an immersive listening experience.
6. Travel to Tokyo: <https://tokyo-travel-project-mariana-tellez.netlify.app/>
 - ✓ Built a captivating Travel to Tokyo Website, providing users with comprehensive information about Tokyo, Japan.
 - ✓ Incorporated engaging Instagram embeds to showcase a collection of pictures shared on the platform, offering visitors a visual glimpse into the atmosphere of Tokyo.
 - ✓ Implemented Google Maps embeds to highlight a selection of recommended cafes throughout the city, providing users with an interactive way to explore Tokyo.

EXPERIENCE

Junior Operations Consultant

Anthares Business | México City, México | September 2021 – August 2022

- Gained comprehensive knowledge of various business aspects including leadership, communication skills, automation, and orchestration projects.

- Developed multimedia content for social media platforms that showcased small and large projects using skills learned in Automation Anywhere and BMC.
- Created efficient bots and projects that streamlined processes such as data extraction and analysis, supplier and employee selection, and automatic reservation filling with Automation 360.
- Contributed significantly to improving organizational efficiency and effectiveness through my work as a Junior Operations Consultant at Anthares Business.

Personal Tutor

Independent Tutoring | State of México, México | January 2019 – October 2020

- Tutored individuals in subjects such as Algebra, Differential and Integral Calculus, Electrical Circuits, and C programming to improve their understanding and performance.
- Leveraged my academic background and tutoring experience to establish a successful small business, helping colleagues and high school students excel in challenging courses.
- Provided tailored instruction and comprehensive exam preparation to help students achieve better grades and increase their confidence in difficult subjects.
